

WE GET MASTERING GOOGLE ADMIN SKILLS AT YOUR OWN PACE.

CDW Amplified™ Collaboration
Amplified Admin Certifications

Google for Education makes consistent setting and feature updates to continue meeting the growing needs of administrators, staff, educators and students. It is the responsibility of your school's IT department to implement any changes so there is no lapse in operability that could affect productivity and security. However, technical staff are often not equipped with the latest knowledge and skill sets necessary to manage the Google Workspace for Education domain, because they don't always have the time or resources to conduct their own research, attend conferences or enroll in semester-long programs.

Amplified Admin Certifications are a collective of courses that equip your technical staff with everything they need to know about key and complex settings, proactive security features, EDU best practices, Chrome management and more at a live virtual event or in a self-paced format.

Amplified Admin Certifications can help you achieve:

Operational Efficiencies

Reduced Risk

Increased Performance

Orchestrating the Right Solution

From the Amplified Admin Certification courses, technical staff learn more about Google Workspace for Education through deep-dives on:

- User-provisioning
- OU set-up
- Activation and deactivation of critical services
- Chrome management
- Google Vault management
- Domain reporting
- Content compliance rules
- Gmail settings
- Advanced Group management
- API controls
- Third-party app control
- Kiosk Mode
- Data protection
- Data Loss Prevention (DLP)
- Classroom and Meet settings
- Chrome user experience
- Account security and setup

CDW's full lifecycle of Services can support your organization no matter where you are on your journey

CDW AMPLIFIED™
for Education

Amplified Admin Certifications

Courses are available for you to earn the following certifications:

Amplified Admin Certifications	Course Value	Description
Level 1	The Admin Console Basics	The Amplified Admin Level 1 Certification guides technical staff through educational best practices, Admin console skills and techniques, and key setting configurations.
Level 2	Advanced Technical Skills	The Amplified Admin Level 2 Certification builds on the basics learned in Level 1 (a prerequisite) to help technical staff leverage Gmail, Drive and Chrome, and solve cybersecurity challenges by addressing more complex settings.
Security Specialist	Protecting End-users	The Amplified Admin Security Specialist Certification provides technical staff with a comprehensive understanding of cybersecurity risk factors and how to mitigate them through Admin console setting configurations.
Chrome Specialist	Maintaining a Fleet of Devices	The Amplified Admin Chrome Specialist Certification teaches technical staff best practices for managing Chromebooks and Chrome OS, and Windows and Mac devices in their Google environment.
